On September 18, 2018, we were blessed with a bouncing bull calf that has been a lot of fun to show and breed. He certainly created a lot of interest around the world. Mr H Pride of Maddox Manso 684/8 is what we consider to be the top son of the legendary +Mr H Maddox Manso 684. The dam to "Pride" is a former show winner and one of our all-time proven donors +Lady H Adelyn Manso 55/9, who has produced close to 40 registered offspring including 11 show winners and multiple herd sires and donors. Not only has Mr H Pride of Maddox Manso 684/8 been a favorite of judges, he is also backed by proven genetics with every animal in the first two generations of his pedigree reaching the ABBA Register of Renown, and his powerful build and performance predictors have attracted cattleman from around the globe. "Pride" is moderate framed, stout structured, big bodied, heavy muscled, with a long and level topline, and a tight sheath. Progressive Brahman breeders and those from other breeds that are looking to incorporate new genetics appreciate the combination of Growth and Carcass that "Pride" offers. The early offspring from this young sire indicate that Mr H Pride of Maddox Manso 684/8 will pass along his superiority. The future should be fun with the success of this great sire and his offspring!

+Mr H Elijah Manso 281/2 was a "star" from the time that he was born. Due to his attractive phenotype Elijah was recognized as the 2014 Reserve National Champion and 2015 International Champion. We have used Elijah successfully with his offspring being named as champions as well as topping our sales. Due to the show ring success of Elijah's offspring, he reached the status of ABBA Register of Renown. Elijah is sired by +Mr H Maddox Manso 684, a bull who will go down in history as one of the breeds most influential sires. Elijah's dam, +Lady H Matilda Manso 731, was a former show winner and Register of Renown donor that resulted from some of our foundation genetics. Although Elijah continues to be used around the world due to the quality of his calves, it has been found that his daughters are one of his strong suits. It should be noted that the 2021 ABBA Show Bull of the Year and many time champion Mr. Bar D MN Ghost Rider is out of an Elijah daughter. Elijah is not only a sire of champions and superior daughters, but he also ranks in the top ½ of the breed for ALL of the economically relevant traits of WW, YW, Milk, REA, and Marbling making him an ALL AROUND SIRE!

Mr H Breaker Manso 103/7 is without question one of our most popular sires due to the quality of his offspring. We showed Breaker to win an International & Reserve National Division Title. Although impressive, it is not his show ring record that is the attraction to this sire, but rather the growth, bone, volume, and outcross pedigree that he offers. The sire to Breaker is the International Champion +Mr. V8 960/5 that we have bred with great success. The dam to Breaker is a proven donor for both us and Carlos Lee and is sired by the Vanguard Sire (+) JDH Sir Liberty Manso and out of a daughter of the International Champion +Mr. V8 846/5 "The Rock" and the Maternal Merit Cow who is also the dam to (=)JJ Cuatro Didor 919/1. As you might expect based on these powerful & proven genetics, Breaker charts positive for the traits of Growth & Carcass. The first progeny by Breaker have done extremely well in the show ring for us and our clients in addition to being well received in the marketplace. The future is bright for Breaker and based on his popularity, we would expect that he will be one of the most widely used sires in the breed.

Mr H Ocu Manso 936/6 is an impact sire that has already been used in Central America, South America, and Africa. In addition to his success internationally the first progeny of Ocu have been garnering championships here in the USA. Ocu offers an exclusive and outcross pedigree, being sired by the proven Vanguard Sire (+)JDH Atlas Manso 328/3 and out of a former show winner and now proven dam that carries some of our foundation genetics. We have always liked

Ocu due to his moderate frame size, bone, depth, and positive performance indicators for Growth, Milk, & Ribeye Area. As a result of his practical build, a number of judges marked Ocu high with him receiving division recognitions at BOTH the National & International Shows. We plan to use this sire extensively due to his pedigree and functional build which compliments many of our females.

Mr H Oxford Rojo 604/4 is one of our most recognized red sires due to the success that he has played around the world. When Oxford was born, we knew that he was special due to his color, moderate frame size, muscle, depth, and bone. We showed this bull with great success, and he accumulated two International Division titles as well as a number of other championships in ABBA Approved Shows. Oxford is sired by the popular and proven +TJF Mr. Smokin Gun 109/7 and out of one of our former champions, +Lady H Trisha Rojo 61/9, who went on to reach the Register of Renown with her first two calves. One of the most recognized sons of Oxford is the many time winner and herd sire Mr H Marco Rojo 190/8. Based on the amount of semen used and reports of superior calves sired by Oxford 604/4, we expect to see many more breed influencers in the near future. We recommend Oxford as a sire for both heifers and cows, with his low birth weight and high performance. If you are looking for a sire that combines the best of pedigree, performance, and phenotype, give Mr H Oxford Rojo 604/4 serious consideration!
